

ASSIGNMENT-2

IBM cloud object storage

The screenshot shows the IBM Cloud Object Storage overview page. The left sidebar contains navigation links: Cloud Object Storage, Storage instances, Cloud Object Storage-u8, Buckets, Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area is titled 'Cloud Object Storage' and includes the subtitle 'An enterprise cloud object storage solution'. A welcome message states: 'Welcome to your new IBM® Cloud Object Storage service! It provides unstructured data storage for cloud applications. To get started - create a bucket, upload objects and set up access policies to allow other users to work with your data.' Below this are two buttons: 'Learn More' and 'Take a guided tutorial'. At the bottom, there are three tabs: 'Overview' (selected), 'Create bucket', and 'Access Management'. A taskbar at the bottom shows various application icons and the system clock indicating 11:53 AM on 10/26/2022.

The screenshot shows the 'Custom bucket' configuration page in the IBM Cloud Object Storage console. The 'Unique bucket name' field contains 'skilandjobassignment3'. A blue information box titled 'Bucket naming rules:' lists the following requirements: 'Must be unique across the whole IBM Cloud Object Storage system', 'Do not use any personal information (any part of a name, address, financial or security accounts or SSN)', 'Must start and end in alphanumeric characters (3 to 63)', and 'Characters allowed: lowercase, numbers and nonconsecutive dots and hyphens'. Under the 'Resiliency' section, three options are shown: 'Cross Region' (Highest availability), 'Regional' (Best performance, selected with a checkmark), and 'Single Site' (Data sovereignty). The 'Location' dropdown is set to 'jp-tok'. A taskbar at the bottom shows various application icons and the system clock indicating 12:02 PM on 10/26/2022.

IBM CloudCatalogManageRuban M's Account

Configure static website hosting to allow an object storage bucket to be used to serve a static web site.

Quota enforcement

This feature is available for our Standard plan customers only. [See pricing](#)

Service integrations (optional)

Encryption

☐ Key management disabled

Encrypt the data in your bucket. Select a key management service.

Monitoring & Activity tracking

☐ Activity tracking disabled

Increase operational visibility into the performance and health of your applications, services, and platforms.

☐ Monitoring disabled

Monitor the activity of your IBM Cloud account. Troubleshoot errors, identify issues, and get alerts with real-time event logs.
